PROFESSIONAL SUMMARY

CSE graduate with hands-on expertise in Python, AI/ML, and full-stack web development. Specialized in building production-ready AI solutions with NLP, speech recognition, and real-time data processing. Developed and deployed end-to-end systems including automatic meeting minutes generation and intelligent voice assistants. Strong leadership background with 3+ years coordinating large-scale technical events for 100+ participants. Proficient communicator fluent in Bengali and English. Seeking challenging roles in software engineering, AI development, automation, or technical business roles.

WORK EXPERIENCE

Customer Relationship Officer May 2026 – July 2026

Ignite Tech Solutions | BPO, Dhaka

- Manage outbound and inbound client communication campaigns for international clients in a fast-paced, target-driven environment.
- Conduct lead qualification, objection handling, and follow-up processes while maintaining accurate client records and documentation.
- Strengthened professional English communication and interpersonal skills through high-volume daily client interactions.
- Consistently met productivity, quality, and turnaround time (TAT) targets within a structured operations workflow.

EDUCATION

BSc in Computer Science and Engineering 2022 – 2026

Bangladesh University of Business and Technology (BUBT)

Higher Secondary Certificate (HSC) 2020

Govt. Bangla College | GPA: 5.00 / 5.00

Secondary School Certificate (SSC) 2018

Mirpur Bangla High School | GPA: 4.83 / 5.00

SKILLS

Programming Languages: C, C++, Python, PHP, JavaScript, HTML/CSS

Frameworks & Libraries: FastAPI, Django (familiar), SpeechRecognition, pyttsx3, OpenCV, pyautogui

AI / ML: Machine Learning, NLP, Whisper (Speech-to-Text), PyAnnote (Speaker Diarization), Google Colab, Kaggle

Databases: MySQL, PostgreSQL, Firebase

APIs & Integration: REST APIs, HTTP protocols, Google Speech API, Wikipedia API, Webhooks (basic), Web Browser Automation

Developer Tools: VS Code, GitHub, Figma, Google Colab, Kaggle

Productivity Tools: MS Excel, MS Word, Google Sheets, Google Docs

Video Editing: Adobe Premiere Pro, After Effects, DaVinci Resolve, CapCut

Languages: Bengali (Native), English (Professional – written & verbal)

Soft Skills: Project Management, Technical Documentation, Presentation, Communication, Time Management, Team Leadership

PROJECTS

Automatic Meeting Minutes Generation System (Thesis) 2025 – 2026

AI/NLP | Python, Whisper (Large-v3), PyAnnote, mT5, mBART, TextRank, BERT, Hugging Face Transformers, FFmpeg

- Developed an end-to-end pipeline for automatic Bengali meeting minutes generation, supporting real-world Bengali-English code-switched speech.
- Integrated Whisper (Large-v3) for ASR and PyAnnote for speaker diarization, producing timestamped, speaker-attributed transcripts.
- Applied both extractive (TextRank, LexRank, TF-IDF, RAKE) and abstractive (mT5, mBART) summarization techniques to generate concise and structured meeting summaries.

- Implemented a multi-class segment classifier using BERT-based embeddings and applied XAI techniques (SHAP, attention visualization) for model interpretability.
- Fine-tuned pretrained multilingual models on Bengali speech datasets using the Hugging Face Transformers framework with noise-robust training via FFmpeg and audiomentations.

Scholario – Assignment & Submission Management System 2026

Full Stack | Next.js, Node.js, Express, PostgreSQL, Prisma ORM, JWT, bcrypt, Axios, React Context API

- Built a full-stack assignment and submission management platform supporting student, teacher, and admin roles with JWT-based authentication and bcrypt password hashing.
- Developed RESTful backend with Express and Prisma ORM on PostgreSQL (Neon), covering assignment CRUD, submission lifecycle, grading with feedback, and role-based access control.
- Designed a modern frontend with Next.js App Router, featuring protected dashboards, toast notifications, and a consistent design system with a teal accent theme.
- Hosted on GitHub with separate backend and frontend structure; planned deployment via Vercel (frontend) and Render (backend).

StudyVault – Online Education Platform 2023

Web Development | PHP, JavaScript, CSS, MySQL, GitHub

- Designed and developed a full-stack web platform enabling students to access and manage online courses.
- Implemented RESTful routing with PHP backend and MySQL database; deployed via GitHub for version control.
- Delivered complete user authentication, course listing, and content management features.

EXTRACURRICULAR ACTIVITIES & CERTIFICATIONS

Video Editor 2025 – 2026

BUBT IT Club

- Produced and edited video content for club events and online platforms.

Event Coordinator 2022 – 2024

BUBT Intra University Programming Contest (3 consecutive years: 2022, 2023, 2024)

- Led coordination of 3 annual programming contests — managing logistics, participant communication, and event execution for 100+ attendees.

Event Coordinator 2024

INNOVATEX Hackathon – BUBT IT Club (Powered by Programming Hero)

- Coordinated one of BUBT's largest hackathon events, overseeing scheduling, team management, and on-ground operations.

Volunteer 2021, 2023

ICPC Asia Dhaka Regional Contest

- Supported operations at one of Asia's most prestigious competitive programming contests, gaining exposure to large-scale tech event management.

2nd Runner Up – BUBT Leader of The Year (Video Editing Segment) 2024

HOBBIES & INTERESTS

Travel Filmmaking (completed 32 districts of Bangladesh) | Videography & Cinematography | Creative Visual Storytelling (Instagram: @FoyezGoneFar)
